SUBJECT: Torrey Sandstone Quarry  
Project No. 06-7047

Dear Mr. Baker:

The Resource Development Coordinating Committee (RDCC) has reviewed this proposal. The Utah Geological Survey comments:

Although there are no paleontological localities recorded in our files for this project area, the Triassic Moenkopi Formation that is exposed here has the potential for yielding significant vertebrate tracksites. The office of the State Paleontologist therefore recommends that a paleontological survey be conducted for this project and its easements by a paleontologist with a valid permit.

The Committee appreciates the opportunity to review this proposal. Please direct any other written questions regarding this correspondence to the Resource Development Coordinating Committee, Public Lands Section, at the above address or call Carolyn Wright at (801) 537-9230.

Sincerely,

John Harja  
Resource Development Coordinating Committee  
Public Lands Section
